Profile Summary

Motivated and passionate software engineering student with hands-on experience in building web applications using modern technologies like React, Node.js, and MongoDB. Committed to writing clean, efficient code and eager to contribute to dynamic development teams.

Skills

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, MongoDB

Version Control: Git & GitHub

Other Tools: Vercel, GitHub Pages

Education

Uganda Institute of Information and Communications Technology (UICT)

Diploma in Software Engineering

Projects

1.   School Website

https://school-website-mainmain-main.vercel.app

Built a responsive, modern school website using React and Tailwind CSS.

2.   University Front Website

https://university-frontwebsite-main.vercel.app

Developed a university website interface with interactive pages and reusable components.

3.   Personal Portfolio

https://ronniesamuelstar.github.io/ronnie

Showcases my skills, projects, and experience in a responsive personal portfolio site.

4.   MERN Stack App

https://mern-app-ronnie-f.vercel.app

A full-stack application using MongoDB, Express, React, and Node.js demonstrating CRUD operations

and authentication.

5. Django project

https://student-management-system-part-3-master.onrender.com

A full school management system using django where datases is stored on sqlite

An admin in able to add staff and sudents and when the student is registered the logs in he/she is

redirected

to the student dashboard while the teacher is being redirected to the teacher dashboard. the teacher

is able to add the students marks and when the student logs in to his/her account they are able to see

their results

while the admin can access both the staff and student dashboard but the student and teacher can not

see the admin dashboard .

the admin sees the marks of students, the total number of the staff members , student's fees, add the

members, and students and more.
